

1 PSTricks Transparency

Mac and Linux users can see transparency on display !!!

The Code

```
\documentclass{article}

% Do not forget load pstricks with option 'distiller'
% if you want to get transparency in generated PDF files.
\usepackage[distiller]{pstricks}

\begin{document}

\section{PSTricks Transparency}

\begin{pspicture}(5,5)
\psset{fillstyle=solid}
\psframe[fillcolor=red](0,1)(3,4)
\psframe[fillcolor=blue,opacity=0.7](2,2)(5,5)
\psframe[fillcolor=green,opacity=0.7](1,0)(4,3)
\pscircle[fillcolor=cyan,opacity=0.5](1.5,3.5){1.25}
\rput(2.5,2.5){\psframebox[fillcolor=magenta,opacity=0.3]{%
% PSTricks do not make transparent text. We use pdfmark ...
\special{ps:gsave [ /ca 0.3 /CA 0.3 /SetTransparency pdfmark}%
\bf\Huge\green Great Box}%
\special{ps:grestore}%
}
\end{pspicture}
